

Hello and thank you for your interest in API's **VPR Alliance** program!

Due to an overwhelming interest in the VPR Alliance, we have introduced some enhancements to the program to both strengthen the value of membership and to help ensure that all manufacturers are designing to the same specification.

We're looking forward to reviewing your unit for possible inclusion into the Alliance. The growing number of manufacturers who are interested in maximizing their sales and reducing costs through Alliance membership can be found listed on the API website.

Please also review the **Program Outline** document, where you will find information on the Alliance's background, purpose, and Alliance membership requirements.

Upon review of the Manufacturer's VPR Alliance Application, we will supply you with the **VPR Alliance 500 Series Specification Sheets**.

If you have any questions regarding the program, please feel free to contact me. We look forward to answering your questions and reviewing your unit.

Sincerely,

Gordon Smart
Managing Director
API
